Hi Michael,

Yes, I can absolutely request that speakers send us their presentations ahead of time. I especially want to do that for the Release Detection webinar since there is a potential for a lot of overlap. I am pretty booked up the next couple of days. Next week, I have Thursday and Friday free. The week of February 4 – 8, I am free Tuesday, Thursday, and Friday.

I confirmed the last speaker for the Release Detection webinar today, so you will all be getting an e-mail soon to pick a date for the actual webinar. Michael, will you or someone else from the team be giving a short intro to each of the webinars?

Thanks,
Jaclyn

Subject: NEIWPCC Biofuels Webinars

Jaclyn--

Andrea and I are happy to see the progress being made with the NEIWPCC Biofuels Webinars and are eager to take part in the upcoming *Release Detection Challenges Posed by Biofuels Webinar*.

As these Webinars are being prepared, can we as the Biofuels Team have a chance to review the Webinars? Is there any way the Team could see the presentations beforehand, or work directly with the presenters to be sure they are presenting accurate information and covering all the items the Team thinks are important?

The upside is we won't experience any surprises the day of the Webinar, and we can ensure that the presentations will be high quality resources that are worth returning to after the Webinars are delivered.

When would you be available for a conference call with the Team to discuss the details?

Let us know soon.
